

Introduction to Java

Computer Programming 1- CSC102S3-G3

Loops in Java

- for loop
- while loop
- do-while loop

LOOPS REPEAT ACTIONS

SO YOU DON'T HAVE TO ...

Execute once and then
repeats things until loop
condition is true

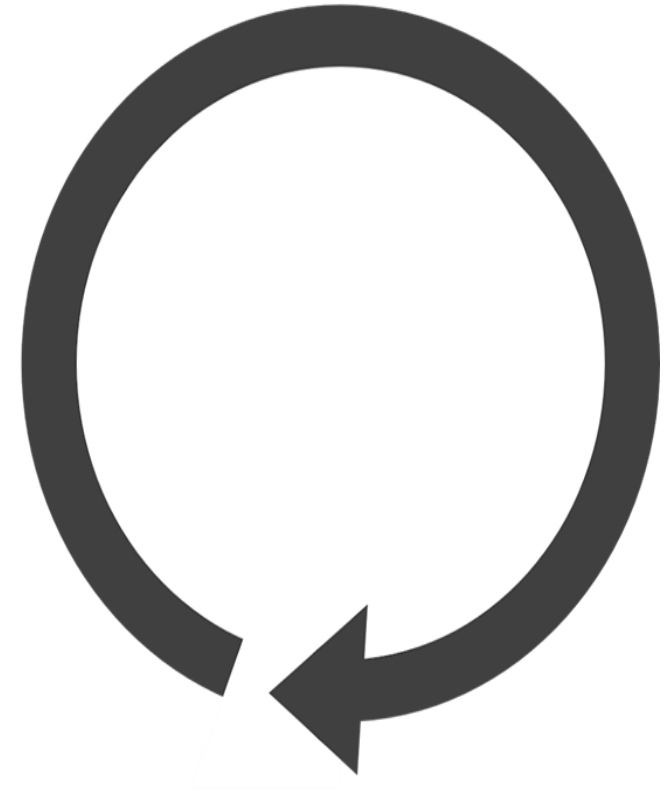

Do While

While

Repeat things until the
loop condition is true

Repeat things till the
given number of times

For

for loop in Java

Simple for loop

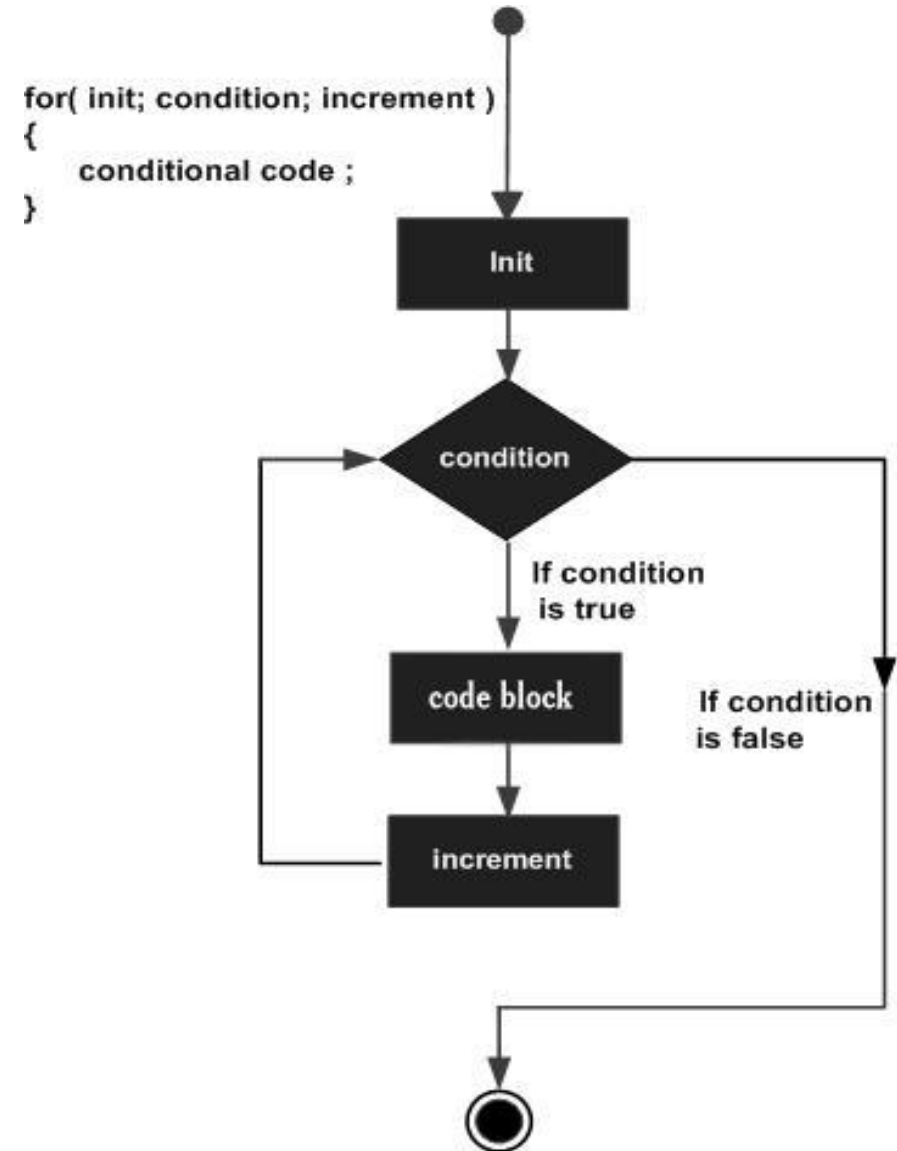

Syntax

```
for(initialization;condition;incr/decr)
```

```
{
```

```
    //code to be executed
```

```
}
```

Example 1

```
public class ForExample
{
    public static void main(String[] args)
    {
        for(int i=1;i<=10;i++)
        {
            System.out.println(i);
        }
    }
}
```

for loop in Java

For each loop

Syntax

```
for(Type var:array)
{
    //code to be executed
}
```

Example 2

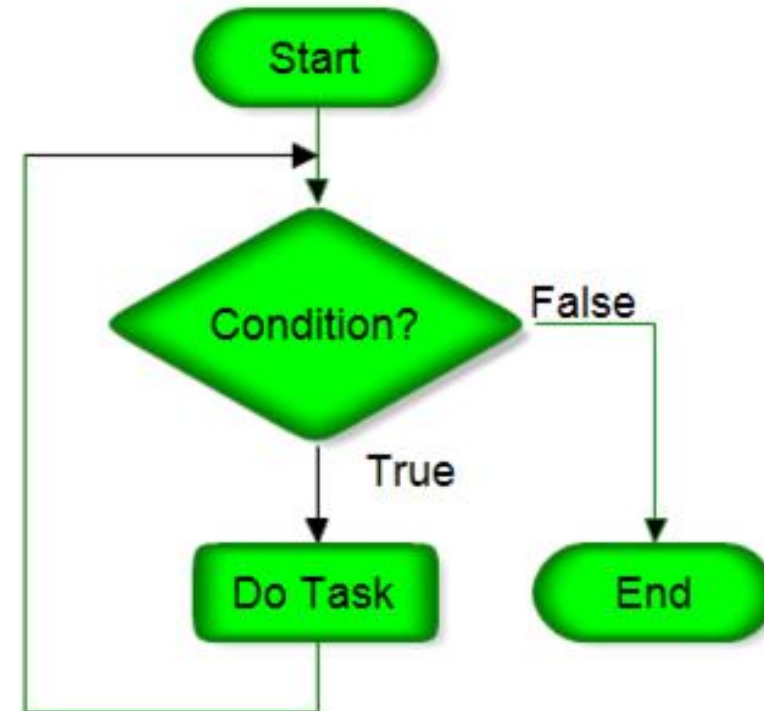

```
public class ForEachExample
{
    public static void main(String[] args)
    {
        int arr[]={12,23,44,56,78};
        for(int i:arr)
        {
            System.out.println(i);
        }
    }
}
```

while loop in Java

Syntax

```
while(condition)
{
    //code to be executed
}
```

While Loop

Example 1

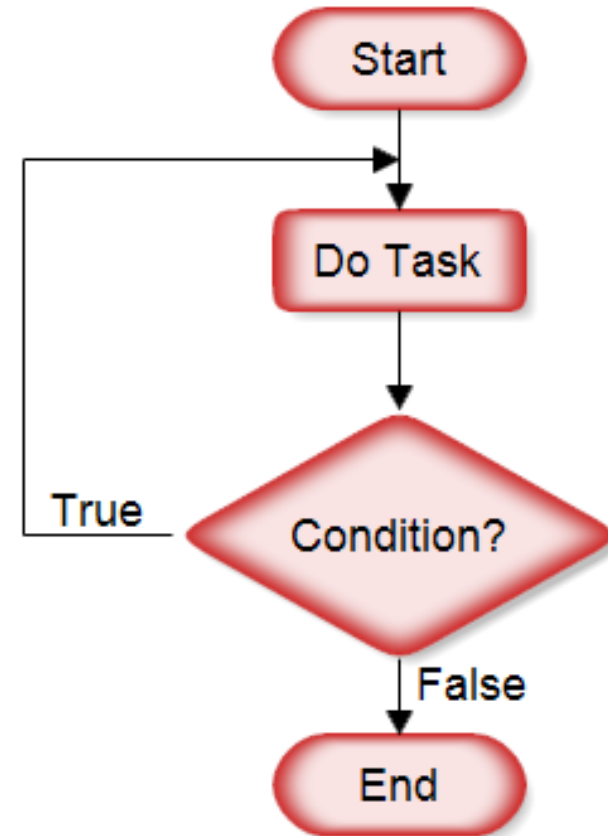

```
public class WhileExample
{
    public static void main(String[] args)
    {
        int i=1;
        while(i<=10)
        {
            System.out.println(i);
            i++;
        }
    }
}
```

do - while loop in Java

Syntax

```
do  
{  
    //code to be executed  
}while(condition);
```

Do While Loop

Example 1

```
public class DoWhileExample
{
    public static void main(String[] args)
    {
        int i=1;
        do{
            System.out.println(i);
            i++;
        }while(i<=10);
    }
}
```
